

ANALYTICS MEETS AUTOMATION

# Automate Your Analytics: Complete Pharmacy Benefits Optimization

Imagine a virtual pharmacy benefits expert analyzing your data every single day, looking for opportunities to reduce cost and improve outcomes, and instantly alerting you to take action immediately.

## Xevant Unlocks The Full Value of Your Solutions

Xevant enables you to fully maximize the value of your proven solutions by instantly and autonomously identifying issues that are uniquely solved by the solutions only you can provide.

### Save Time and Money: Automate

Replace decades-old, manual, and costly processes of reporting and analysis by deploying Xevant's full suite of automated expert analytics.

### Elevate Accuracy and Quality

In today's commodity-based view of pharmacy benefits, a premium is placed on the ability to deliver better quality. Xevant infuses proven, expert pharmacy analysis in every daily review of claims.

### Accelerate Performance and Results

Your clients depend on you to achieve the lowest costs and highest outcomes. Streamline, accelerate, and maximize client performance by identifying and solving issues immediately.

### Achieve Client Satisfaction and Retention

Xevant creates an environment where clients would never dream of leaving for fear of losing savings and outcomes that only you can provide.

claims

# 3,000

### Reports Available

Over 3,000  
reports from 300  
dashboards

# 20Yrs

### Success With Payers

Over 20 years

## Xevant: Analytics Meets Automation

Xevant is a large collection of powerful data-focused solutions that work together to save you time through automation and real-time reporting. These seven modules are the core of Xevant.

### DataLogic: Data Management and Translation

DataLogic transforms data from hundreds of vendors - from PBMs to administrators - and integrates them into a single source of truth. DataLogic is the engine that drives all other Xevant solutions, making real-time pharmacy data analysis possible.

### ScripLogic: Real-Time Pharmacy Benefits

ScripLogic delivers precise reports on pharmacy benefits. With clear views into pharmacy data, you can review utilization, drug, and member trends all from a single location. Monitor active performance alerts, maximize utilization performance, and identify key drivers of drug costs in order to deliver cost savings for each client.

### Xevant Scorecard: Centralized Performance Management

Over 100 key trends, insights, and analysis all in a single view. The Scorecard contains quick and easy access to the most critical pharmacy KPIs with the ability to drill from the top metrics down to the most granular claim details in seconds. A centralized location to determine the pathway to pursue in optimizing each of your client performances.

### FinanceLogic: Complete Pharmacy Benefits Financial Insight

Ever wondered how well drug pricing performance stacked up against contractual guarantees? How about projected rebates based on specific client utilization? FinanceLogic facilitates financial audits of both, every day for every single claim. When combined with the ability to receive daily, weekly, and monthly alerts, you will have the resources at your fingertips to not only know when it's time to engage but what exactly to do about it.

### ClinicalLogic: Clinical Program Optimization

Clinical programs are uniquely yours. ClinicalLogic helps to enhance and automate the arduous analytical requirement of reporting on patient behavior and clinical program performance so you don't have to. Instead of running daily patient reports to identify qualified patients for your clinical programs, custom reports show up in your inbox tailored to your programs. All you have to do is run your clinical program and ClinicalLogic will do the rest.

### AlertLogic: The Power of Automated Performance Management

The ultimate in claims analysis, performance tracking, and client management. Enable client and business stakeholders to track performance across any or all clients and across all reporting performance metrics. Instead of running dozens of reports for each client and pouring over them to identify issues and opportunities, AlertLogic will do this every single day, for every single client, and tap you on the shoulder when it's time to engage.

### BidLogic: Real-time Claims Repricing and Proposals

Xevant's proprietary "Data in Motion" suite of apps enables lightning fast claims repricing. BidLogic analyzes vast claims datasets against an unlimited number of PBM rates resulting in immediate client savings opportunities - presented within comprehensive, automated proposals. From claims data to custom pricing proposals, BidLogic can produce a highly custom pricing proposal in less than a few minutes. Even better, it will protect your bottom line by helping you to select the best rate for your clients and your business.
